Seafood Marketing: Is It Time for a Unified Approach? The Case of Norwegian Seafood

Ragnar Tveteras
University of Stavanger

Disclaimer

Much of the material in this presentation has been provided by the Norwegian Seafood Council.

However, opinions expressed are those of the presenter. They do not purport to reflect the opinions or views of the Norwegian Seafood Council or companies in the Norwegian seafood sector.

Norwegian Seafood Council (NSC)

What is the rationale for its establishment?

How is NSC organized and financed?

What are NSC's activities?

How is NSC evaluated?

What are concerns in the Norwegian industry?

SEAFOOD
FROM
NORWAY

What is the rationale for establishment of NSC?

Need to increase demand for seafood from Norway

Commodity nature of many seafood products → free rider problem of product promotion

Limited internal human and financial resources in companies

Collective financing and promotion from 1991

Mission

Increasing the value of Norwegian seafood

le Perchole

N

#NORWAYSTORIES

#NORWAYSTORIES

#NORWAYSTORIES

How is it organized and financed?

Mandate from Norwegian government through law
Necessary due to free rider problem

Seafood industry finances the activities of the Council through fees levied on all exports of Norwegian seafood

Salmonids and pelagics: Levy 0.3% of export value

Whitefish and other species: Levy 0.75% of export value

Budget of the Norwegian Seafood Council

- Expenditures increasing from 20 to over 50 million USD.
- In 2017 and 2018 also 50 million USD
- Salmon over 50%
- Promotion intensity – promotion expenditure divided by export revenues - on average 0.6%

Vision

Together we will win the world for Norwegian seafood

Mission

To increase the value of Norwegian seafood in established and new markets

Goals

To be an important contributor to the position and value creation (measured and perceived) of Norwegian seafood.

Species' strategies

Salmon and trout

Codfish

Pelagic

Shellfish

Conventional products

Areas of value creation

Market insight and competence

Market access

Brand and reputation

Reputational risk management

Consumer initiatives

How we intend to meet expectations

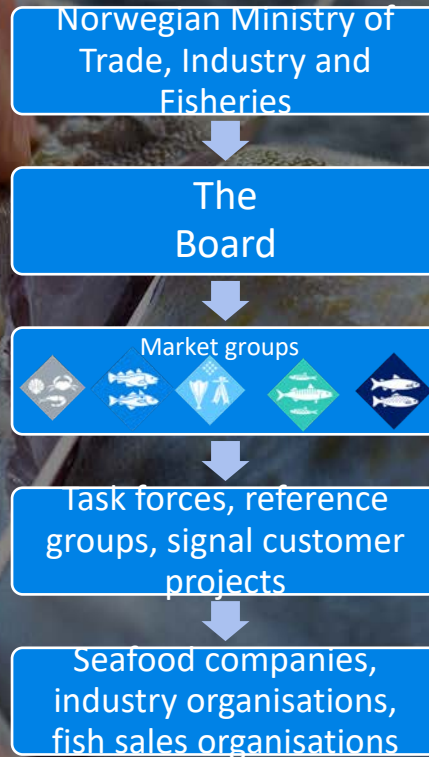

Customer focus
Collaboration with the industry

Broad value chain perspective

Market focused platform

Results oriented

Governance structure

Industry ownership and representation

Approx. 70 employees

What are NSC's activities?

Marketing

Increase demand for Norwegian seafood through a broad range of marketing activities

Market insight

Market insight to industry based on statistics, trade information, consumption and consumer insight.

Communication and market risk management

Safeguard the reputation of Norwegian seafood, including proactive market risk management

**Noruega
tiene unas
condiciones
de vida
perfectas.**

Para el salmón.

¿Por qué alguien elegiría
un lugar tan inhóspito
para vivir?

Porque es el lugar
perfecto para los peces.

Las aguas frías y
cristalinas hacen que el
salmón noruego crezca
lentamente y adquiera
un sabor perfecto.

A scenic landscape at dusk or dawn, featuring snow-capped mountains and a calm body of water reflecting the sky and distant lights. The text "How is NSC evaluated?" is centered in the image.

How is NSC evaluated?

Is the investment profitable?

Measured by: ROI/ROMI

**Is the industry satisfied
with the execution?**

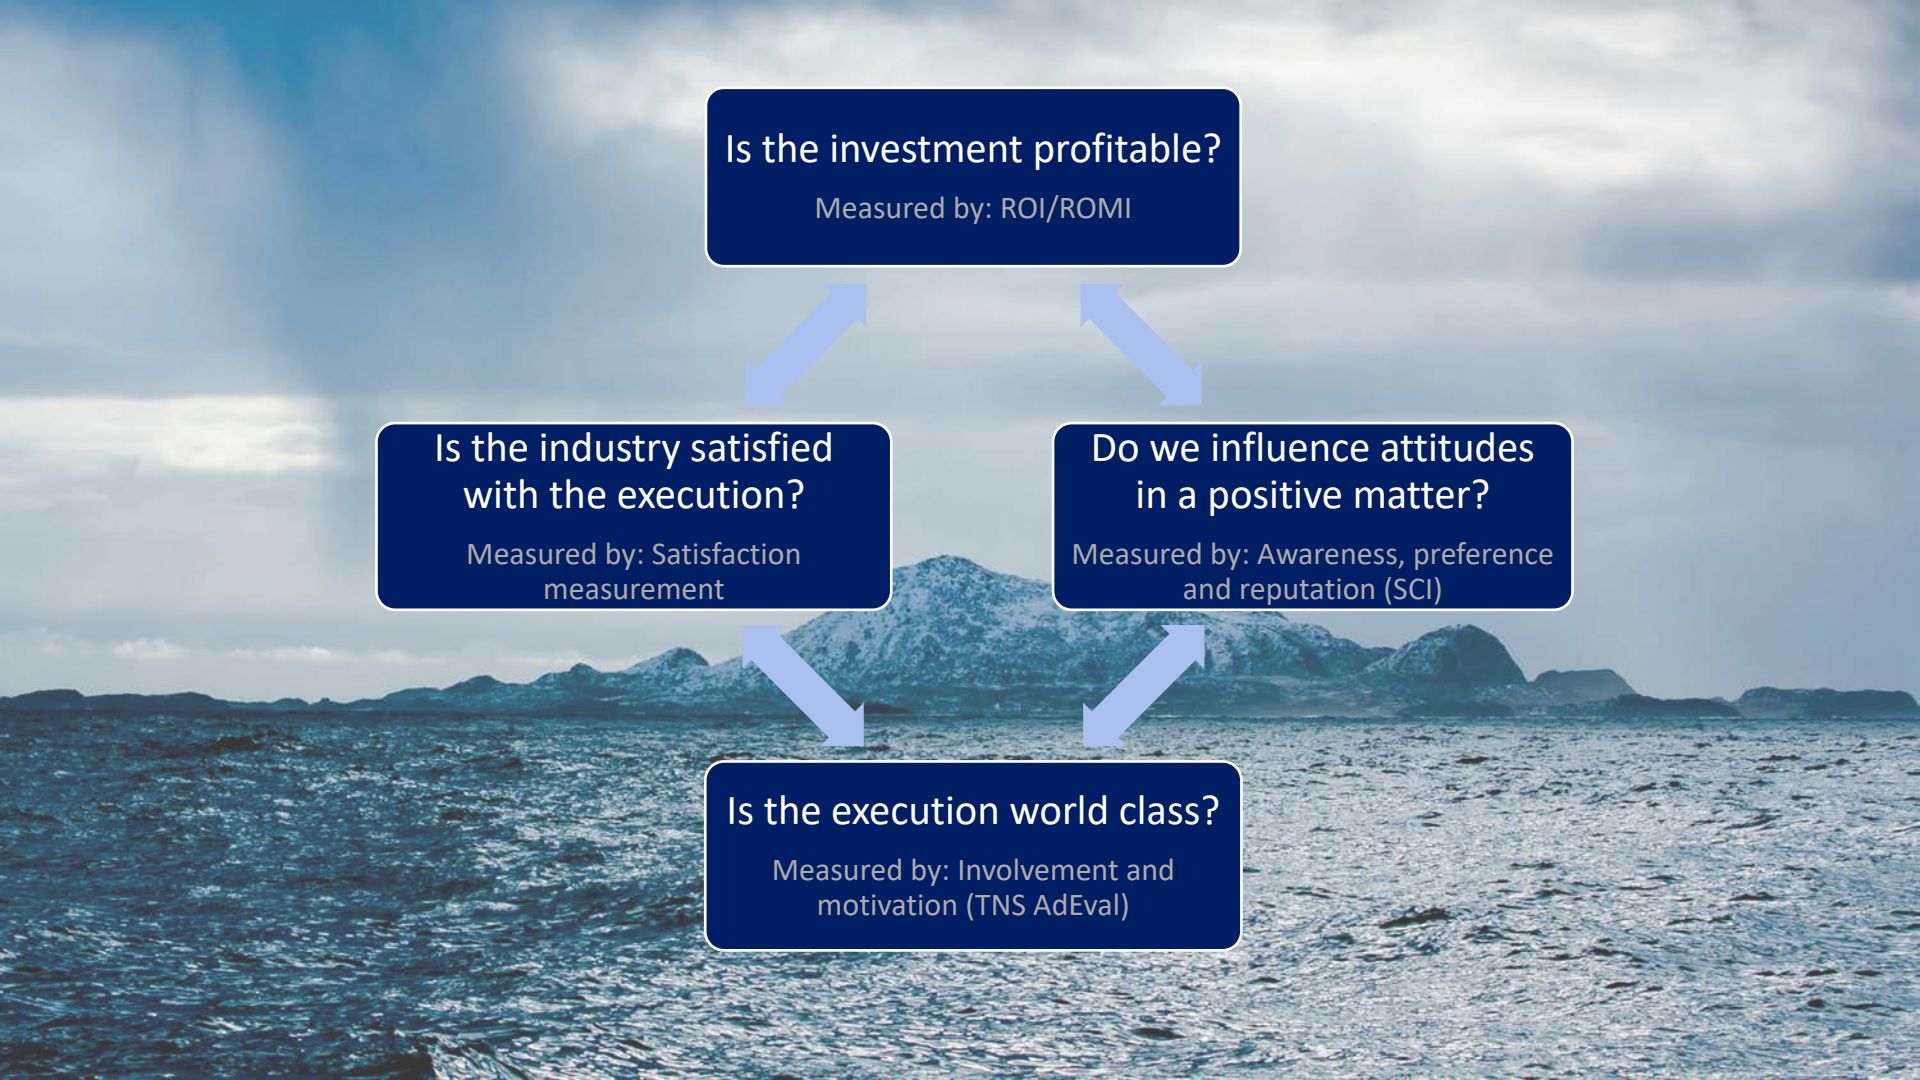

Measured by: Satisfaction
measurement

**Do we influence attitudes
in a positive matter?**

Measured by: Awareness, preference
and reputation (SCI)

Is the execution world class?

Measured by: Involvement and
motivation (TNS AdEval)

Does NSC influence attitudes in a positive direction?

Source: 18 countries Seafood Consumer Index

Note: Change of logo in 2017, thus the low rate of logo-recall

Results of campaign in Spain: Facebook, TV and POS

| | ROI (return per 1 Euro invested) | Food and Beverage benchmark | Benchmark |
|----------|----------------------------------|-----------------------------|-----------|
| Total | 1.54 | 1.03 | 0.97 |
| TV | 1.56 | 0.82 | 0.77 |
| POS | 1.11 | - | |
| Facebook | 5.44 | 2.60 | 2.38 |

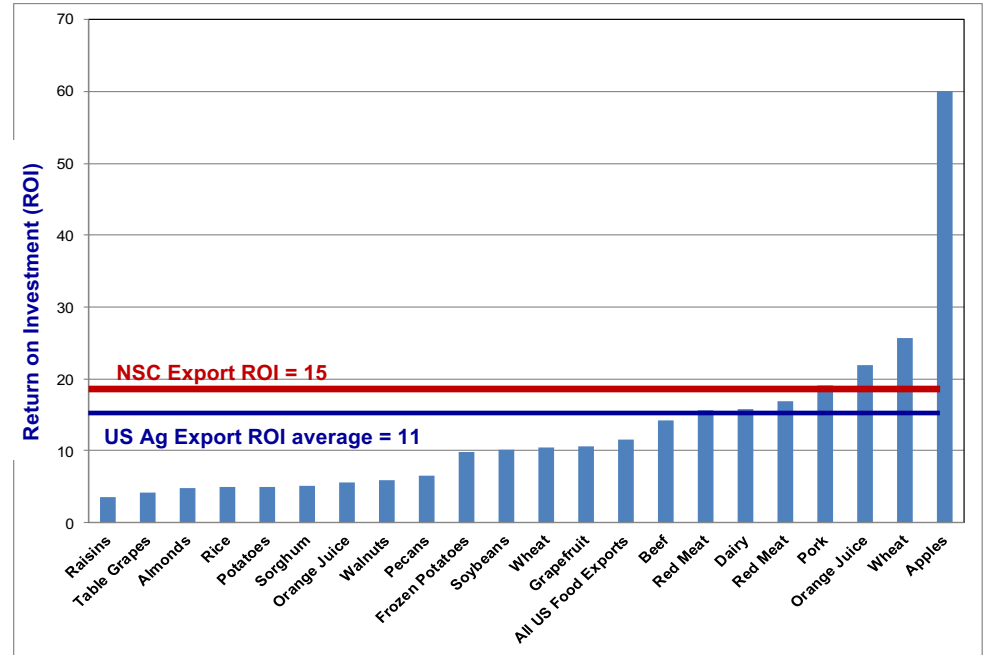

Returns to investment? Increase in sales due to promotion

Increase in export revenue divided by promotion expenditure is estimated at 15:1 for Norwegian seafood.

For salmon in particular typical estimates in the range 5:1 to 10:1.

US agricultural export average is 11:1.

Source: Capps and Williams (2017).

SEA FROM
NORWAY

The Norwegian flag is positioned vertically to the right of the text 'SEA FROM NORWAY'. It consists of three horizontal stripes: red at the top, white in the middle, and blue at the bottom.

What are concerns about
NSC in the Norwegian
industry?

The background of the slide is a photograph of a Norwegian landscape at dusk or dawn. The scene features a calm body of water in the foreground, reflecting the sky and the lights of a small town or village on the distant shore. The mountains in the background are dark and rugged, with some snow visible. The overall color palette is dominated by deep blues and greys, with a few warm orange and yellow lights from the town.

Challenges with the generic commodity promotion

A company funding the NSC program...

- can clearly observe the costs of the program in its accounts
- but may struggle to isolate the effect of the program on its own sales revenue

Some companies funding the NSC program may...

- think that other producer countries may benefit from Norwegian investments
- think that NSC has not chosen the "right" marketing mix, markets, etc.
- agree that the industry have some benefits in sum, but that their own company do not benefit because of its particular products and geographic markets
- think that they can spend the money themselves and get higher private returns

Summary – lessons from Norway

- Much of the Norwegian seafood marketed to consumers – including salmon - still has commodity characteristics
- NSC still enjoy broad support in the industry, but with vocal critics
- A promotion program with an efficient and adaptive portfolio of marketing activities can provide high returns to the seafood industry
- The industry has to own the program through board representation, participation in marketing activities, etc.
- Continuous debate within the industry about different dimensions of the program is necessary
